Antworten

- 1) Tim bought 4,8 lbs of cherry and lime jelly beans for his birthday party. If 2,3 lbs were cherry flavor, how many pounds were lime flavor?
- 2) Felix and Pauline were comparing the distance they ran over a week. If Felix ran 10,55 miles and Pauline ran 6,8 miles, how far did they run total?
- 3) A botanist was measuring how tall her plant grew. After two weeks it had grown 15,46 inches. The second week alone it had grown 5,56 inches! How much did it grow the first week?
- 4) A computer programmer had two files. The first was 30,66 gigabytes and the second was 48,2 gigabytes. What is the total file size of both?
- 5) Alina was checking the weight of a gold nugget and a piece of fool's gold. Together they weighed 92,5 grams. If the fool's gold was 23,80 grams, how much did the gold nugget weigh?
- 6) A weatherman was measuring the amount of rain two cities received over a week. City A received 9,46 inches while City B received 6,6 inches. How much rain did they get total?
- 7) Florian was checking how much power his lights used. His first light by itself used 57,19 amps. When he turned on the second light, together they used 147,59 amps. How many amps did just the second light use?
- 8) Justin was training for a marathon. On his first day he ran 3,71 kilometers. On the second day he ran 1,4 kilometers. How far did he run altogether?
- 9) Lisa downloaded two apps which were 10,45 kb total. If one app was 6,55 kb, how big was the other app?
- 10) Nils was weighing the amount of candy he received for Halloween. If he received 5,49 kg and his brother received 9,7 kg, how much candy did they get all together?

1. _____
2. _____
3. _____
4. _____

- 1) Jan was checking how much power his lights used. His first light by itself used 64,63 amps. When he turned on the second light, together they used 164,33 amps. How many amps did just the second light use?
- 2) Daniel was making some brownies and cupcakes for his school fundraiser. If the brownies needed 2,16 cups of sugar and the cupcakes needed 1,4 cups, how much sugar would he need altogether?
- 3) Felix and Jasmin were running a relay race. The race was 26,52 kilometers total. If Felix ran 10,12 kilometers how far did Jasmin run?
- 4) Celina was trying to put some files on her flash drive. If she had one file that was 9,67 mb and another file that was 6,2 mb what is their combined file size?
- 5) Jakob weighed the candy he and his brother got from Halloween. Together they received 9,13 kg of candy. If Jakob's amount was 5,93 kg how much was his brothers?
- 6) During a science experiment, Mary found the mass of two rocks to be 40,13 grams and 78,6 grams. What is the total mass of these two rocks?
- 7) A botanist was measuring how tall her plant grew. After two weeks it had grown 7,71 inches. The second week alone it had grown 1,41 inches! How much did it grow the first week?
- 8) A weatherman was measuring the amount of rain two cities received over a week. City A received 6,62 inches while City B received 2,5 inches. How much rain did they get total?
- 9) Philipp ate a snack with 95,69 total calories. If the chips he ate were 48,79 calories, how many calories were in the rest of his snack?
- 10) Tobias was training for a marathon. On his first day he ran 2,3 kilometers. On the second day he ran 1,3 kilometers. How far did he run altogether?
